Alfdex aftermarket kits

The crankcase ventilation system from Alfdex with its patented technology first started being equipped by the Volvo Group, Navistar International and Daimler in 2006 for engines fulfilling the EPA07 legislation. Since then, over five million units have been sold globally. Alfdex is currently installed on **all** proprietary engines over 9L for Mack, Volvo, Freightliner, Western Star and International trucks in the US. On the off-road segment the Alfdex is assembled on John Deere and AGCO engines. We have also been assembled on Kenworth and Peterbilt MX engine before 2014. The aftermarket kits has been developed to reach all these brands. They are shelf-ready products with installation instructions. The product is of equal quality as the units it replaces. Alfdex is a durable product; however with high mileage the components could wear out. We have detected a growing demand for replacement-parts from the OE's. The kits are only available through the independent aftermarket channel.

BRAND	Freightliner & Western Star	Volvo & Mack	International	Kenworth & Peterbilt
ENGINE	Detroit Diesel: DD13, DD15, DD15TC, DD16 & S60.	Mack: MP7, MP8 & MP10. Volvo: D11, D13 & D16.	Maxxforce: DT & 9	Paccar: MX-10
